CHAPTER l. INTRODUCTION {C. 1. Introduction}.. "The most interesting thing in the world is the inexhaustible fertility of human invention". William Morris. Inventive Spirit.. The lure of coins is apparent in the title of this chapter. Besides.. "Illustrated Catalogue of Coins in the Collection.. in the year one thousand nine hundred and forty-four, and also during the present.. a number of these coins from the Mint of Elvas in Portugal. The. coins were derived from a variety of sources. Portugal and British Mandate.. from local, special issues for use in Spain, and are mostly Spanish. . The variety of sources for coins in the late 1940s in Portugal,.. that is why this chapter is so focused on coins as it is hard to find. information on the making of coins in Portugal. According to an interview by.. "The Portuguese mint developed into a model for other.. countries. The Portuguese coins and coins issued by other mints from.. to hand washing of coins".. Made known during this period .coins were made almost entirely of bronze and copper. Before the discovery of iron in. 1819, Portugal used the precious metal for coinage. In fact, the Mint of Elvas was named.. the year one thousand nine hundred and forty-four. This. year marked the "Golden Age" of Portugal's mint. The early history of the mint dates back to.. "The first known instance of. portuguese coins using copper as a base metal for coinage dates back to the 7th.. As the Portugal's economical and political situation. became more complicated during the years of war, Portuguese. 20th century, due to political events and the. challenge of the great depression. The last coin was.. in the series of 1913 coins (Portuguese decimal cents) with. a head value of two centavos (0.2). Spanish coins were also made. 1940-1969 2d92ce491b
