Wings XP 5 is a software that can be used to design embroidery patterns. You can import images from the Internet, add color and add additional designs to your embroidery pattern before you start stitching. This article will give you a complete guide on how you can download and use Wings XP 5. There are also ways in which users have customized this software for their own requirements so it has been shared in this article too. It will help beginners get a better understanding of the thread, hoop, needle and fabric requirements when designing anything using Wings XP 5. The latest version 5 of Wings XP was released in 2011 and assures better color management and a host of new features. Wings has always had a good niche with their embroidery software and this version is supposed to be even better than the previous versions. The software comes as a complete package which includes all the following: Wings XP 5.00 MS Windows XP/7/8™ compatible ™-   16MB RAM, DirectX 9. 0 compatible hard drive Wings XP 5.01 MS Windows XP/7/8™ capable ™-   45MB RAM, DirectX 9.0 compatible hard drive Configure:\t For Windows XP and higher versions and drivers and utilities and other options and tools to help you get the most out of your machine Other support for this software package is available from the Wings community forums [blogspot] [web link]. Download: As already mentioned above this is a complete package which includes all the following: Wings XP 5. 00 Not completely compatible with XP Wings XP 5.01 Compatible with XP/Vista/7/8, too There are other support options available for this package if you are having technical issues with the software. The software comes pre-packaged as a zip file which can be downloaded instantly from the download page on the Wings website. 1. Download and Install Wings XP 5 Zip File Install this file by double clicking on it. You just have to follow the installation guide that is provided onscreen which is very easy to use even for beginners. 2. Register on the Wings Community Forums To get support for this software you will need to register on the Wings Community forums [blogspot] [web link]. This is the only way you can get support on this software. On the forum you will find detailed instructions on how to use your new software package. There are also lots of threads where users are asking for help and getting some suggestions from other users on how it can be improved or tweaked to make it more like their requirements or preferences. 3.
