Hack facebook password free with the latest version of the Facebook Password Hacker Pro 2.8.9 License Key.Q: Call to undefined function App\Http\Controllers\IndexController::registerSession() So i have started learning symfony after using Yii framework and since i have learnt some new concepts of symfony i started with creating a sample project which i can use it for my day to day work. But after reading some tutorials i came to know that i need to setup the session first. So to learn that i created the following code in my controller: `render('index'); } public function registerSession() { session_start(); } }`
