4.2.1.6 Which Libraries did I miss? we looked at the Add. library dialog in Figure 13.7. In Figure 13.8 we can see that there are two choices for the simulation library. Let us choose DFMODEL and see what it does. Figure 13.8: Adding Library. In Figure 13.9 we can see the import library for the design. Figure 13.10: Creating a Design from the Library. The result of these actions was that the design was added to our design. The input file that was used to create this design can be found in the directory, C:\W=1\LOGICWORKS\HOMEDESIGN\DESIGN\AMS\AMS052\0.

When we look at the design that was created, we find that the design will simulate using . Logic Works 5 Download Full Version . The other way we could do this would be to . Create a folder on the hard drive that you have write access to. This folder will be called \LOGICWORKS\WEB. Isolate the design that you want to import. Copy the design into this folder.
