Here is My Snippet Links and Final Word . My code is not working properly. I am trying to fetch the link of a particular post which has a tag, and then to fetch the link of all the posts that belong to the post I fetched. This part of the code seems to be working fine. Projects ';?> ';?> $tag_name, 'post__not_in' => array($post_id)); $posts = get_posts($args); foreach ($posts as $post) : setup_postdata($post); ?> 2d92ce491b
