Aaaaahhh, Megaman" The new graphics engine, combined with the CyberLink Magic Movie feature, make PowerDirector the best video editing software for Mac OS X. PowerDirector 12 adds easier-to-use wizards, and new effects such as Green Screen, and TimeWarp, which lets you simulate moving through the scene at different speeds. A redesigned user interface is easier to navigate, and QuickTime VR lets you easily stitch together all your creations in CyberLink Movie Studio. PowerDirector 12 is the first application to ship on Mac OS X Leopard, and now includes a new Magic Preview application that lets you preview your movie in Windows Live Movie Maker, and remotely using a Windows Vista host, or even the Internet. But the fun just doesn't stop there.

You can use CyberLink's new Magic Moments feature to remove unwanted facial blemishes and wrinkles, while an improved face replacement functionality allows you to use the faces of other people to replace your own. With the new Create Animator feature, you can now create a movie in the program and have another user, using the program's link feature, send it to their phone. All these new features, plus a redesigned interface and easy-to-use wizards make
