Different versions of software utilise different algorithms and dates. The display on your phone or tablet will reflect what the GPS device is reporting, the information displayed being accurate until you upgrade to a newer version of software. Will this work on my Phone? Try it out and find out! Phone Geeks are able to use the Tracking Key Pro on a range of smart devices. To use your device's camera, your device needs to be equipped with a video streamer and your device's IP address will need to be known to the Tracking Key. It is recommended that you obtain the Tracking Key from your Cloud service provider or from the LandAirSea website. What are the keys for? The two keys (in white) are for your checking your location and monitoring your device from. The white key is not required for your monitoring your device, however it is recommended if you are to install a mobile tracking device onto a car with a key fob. These two keys are passed to you as a single registered unit when purchasing your GPS Tracker. If you are going to monitor
