The documentation says to download a SQLCipher.jar, which I did, but when I copy the jar to my Libs folder and try to import it in the library section of my project, the library does not appear in my project. I can't find any good solution to this problem. Any help? A: For those who still haven't found a solution, I solved it. I don't know if it's a kind of bug or if I made a mistake but the solution is that I removed SQLCipher from my libs folder and installed it inside my android/libs folder as well as inside my project/libs folder and then I have to import the jar file again. This solution worked for me. LAS VEGAS — Feb. 25, 2020 — Imperial Crown Enterprises, a leading real estate investment, development, and management company, in Las Vegas has closed on the \$115 million purchase of The Excalibur Hotel & Casino, a purchase which will see it acquire the iconic casino for \$11 million. With plans to invest in additional Las Vegas real estate and build on its casino holdings, the company will acquire The Excalibur, a legendary property that in recent years was widely eyed as one of the most popular gaming destinations in the world. The Excalibur is home to iconic properties like the "Gambling Hall of Fame," and was the location of one of the most notorious events in recent U.S. casino history, the 1999 Massacre at the Jackpot Café, when a man pulled out a gun and fired on casino patrons and employees. "Las Vegas is a city that always has been and always will be about opportunities, and the purchase of The Excalibur is an example of that," said Eddie Wills, chairman of Imperial Crown Enterprises. "It's in a prime location, with great views and amenities, and as a casino, it offers a solid opportunity to capitalize on the increasing demand for casino experiences 2d92ce491b
