Q: Returning a value from a subroutine and initializing it I want to create a separate subroutine to calculate something that I want to return. The subroutine is shown below. sub myfunc(a,b,c) This is what I have tried so far, but it does not work. I have two functions and I want the second function to return a value that is calculated using the first function. isInt(a,b,c) isInt(a,b,c) = myfunc(a,b,c) end sub A: 70238732e0
