Author: Mohammad R. Mahdavi Version: 1.6.4 Website: This is a small program that can be used to find out if the microphone is connected. This is useful for automated software that uses the same input as the audio/video device. It does a simple report test to the microphone and indicates the status of the microphone. The status it can be: - MICROPHONE: in use - MICROPHONE_UNAVAILABLE: MICROPHONE is connected but not available - MICROPHONE_NOT_AVAILABLE: MICROPHONE is not connected 32bit and 64bit versions of this code are included in the ZIP file. Known problems The interface may take a long time to load on some computers when using the default settings. Please help to improve this software by reporting any bugs you find. You are not allowed to use this software for any commercial or other purposes. ===== Note on the FREE versions: ===== This program is distributed with a GPL license, the restrictions imposed by which will be listed here. If you want to do a non-commercial and non-profit work, you can get a fully working version of the software without any restrictions as long as you distribute the software free of charge. By installing this software you agree to the terms of the license. ===== The complete license text can be found in the software's LICENSE.txt file. ===== GPL is a license similar to the GNU General Public License (GPL). The GPL is a copyleft license, which means that all users of the software and all modifications that they make to the software must also be made freely available to all users of the software. It is a free, non-proprietary license, so there is no extra cost for you. If you use the software and make modifications to it, then you must also be allowed to distribute those modifications under the GPL license, so that other people can use them and benefit from your improvements.
