ActionParsnip: then I can't do it from the ISO I should be able to do it from a USB drive I am not understanding this ToStItOs: the bios may not allow usb booting I have the ISO on a USB drive and it won't work from that how to restrict access for sudo to specific folder or to any of its subfolder or subsubfolder or any other directories? How does this work I've never seen something like this ToStItOs: there may be a setting in the bios Ok ToStItOs: when you boot the iso from USB, it will tell the bios to boot from the USB I will try how to boot from usb drive? darkham: it's a way to boot an ISO !noroot | nic1 nic1: We don't support having a root password set. See!root and!wfm for more information. !wfm | nic1 nic1: Common Sense: Just because you can, does not mean you should (and especially recommend to others). Think before you do. "Works for me" does not mean it is ok. The latest version of everything is not always
