Field of the Invention The present invention relates to a camera having a finder apparatus and a light measuring apparatus, such as a digital camera. 2. Description of the Related Art There have been known digital cameras having a finder apparatus in addition to a light measuring apparatus, such as a CCD, provided in a main body of the digital camera. Examples of the digital cameras having a finder apparatus include a camera disclosed in Japanese Patent Application Laid-Open No. 2005-113526. In the disclosed digital camera, a finder apparatus is provided in the main body of the camera in the form of a portion of a finder window. A light measuring apparatus provided in the main body of the camera is disposed in a region outside the finder window. The light measuring apparatus is arranged to measure incident light through the finder window and to generate a light measurement value. Japanese Patent Application Laid-Open No. 2005-113526 discloses a method of adjusting a light measurement value generated by the light measuring apparatus based on a detection result 2d92ce491b
