log error message message and it is repeated when the first boot finishes. qwd: first make sure you actually got all the.debs you got from the repo. !details | qwd qwd: Please elaborate; your question or issue may not seem clear or detailed enough for people to help you. Please give more detailed information; for example, we might need errors, steps, relevant configuration files, Ubuntu version, and hardware information. Use a!pastebin to avoid flooding the channel. I found the following errors in.log file: ./functions.sh: Line: 47: [: -lt: unary operator expected k1l_: if this was when it was working I don't have these files anymore. They must have been in a different part of the filesystem or something. nacc: k1l_: I know it's going to be a pain in the butt. I wish I could fix this problem while I still had everything in place. qwd: what ubuntu exactly? what are you missing exactly? zetheroo: i'm not sure that's the file, but it's a file that was generated by ubuntu-provided packages, not anything else
