In vivo and in vitro experiments on the vascular blood vessels of rats and rabbits were performed to elucidate the mechanism of development of non-linear chemical reactions. It was demonstrated that the local factors such as local pressure of blood, blood oxygen tension and the concentration of local regulatory substances and the systemic factors such as the state of the heart and of the vascular bed may significantly affect the development of the blood vessel's chemical reactions. In vitro studies on the vascular wall of different regions of the vascular bed were performed. It was shown that the state of the vascular wall and the reactions of blood vessels that are initiated by a short-term hypercapnia are determined by a number of regulatory mechanisms.1

As far as usability goes, it really is. You do not have to remember any complex passwords ever again. All you have to do is store the passwords in a single file, and as long as that file is safely kept (and ideally, encrypted), you are safe. While these programs are indeed great, there is a downside to them: lots of websites do not support password managers, so you may have some awkward moments when logging into your accounts. The solution to these problems is a browser extension. Let us see how to create an extension of your own, so you can use any password manager you like.
