Also, the developer cannot take credit for

the game (they just put their name as a copyright) because a license from the original developer must be acquired to do so. You're paying for a product, not the right to make money. How can it say I'm paying for a product and not the right to make money? It's a package with a price tag. Also, I've paid and I'm playing it. I don't like the ads and I don't want to pay for a game I didn't ask for (and shouldn't have been made in the first place). I bought a license from another company and I'm playing a game I didn't want to play. You're paying for a license to play the game. Because I don't have any desire to play that
