System Requirements:

Windows: Mac OS X: Virtua Fighter 5: Final Showdown Retro Grand Prix 2 Graphically, the game looks amazing. It's using the Unreal 3 engine, and it looks so good that it's nearly unrecognizable as a PS2 game. My one gripe is the light brown texturing of the car graphics. It's not as crisp as it could be, and it really took me out of the experience. The framerate was decent, but not super-fast. I got the game on the regular DualShock 3 controller
