

[Download](#)

riffstation .rar is my project which I would like to open in RIFF-Xpress program. I'm not sure how to open .rar . Also, I'm not sure how to convert it to normal format. I tried rar2bin . It opens the .rar file without issue. Can anyone help I know this is a bit old, but I found the answer while looking for it. To open rar files, you need to have a rar program on your computer. You can download some of them (mostly free programs I guess) from the internet.
