Creating an add-on application for AutoCAD Cracked Version has become a multi-million dollar business, driven by intellectual property for corporate desktop publishing. Microsoft has recognized the importance of third-party development for AutoCAD. In 2010, they announced that they would enable direct access to the Microsoft.NET framework through Visual Studio, allowing AutoCAD developers to use the framework to add functionality to their applications. In 2012, they added similar capability to their Visual C++ software development kit, allowing AutoCAD developers to use the C++ language to add functionality to their applications. In 2015, it was announced that both add-on authors and AutoCAD vendors were eligible for a license revenue share. Is Odell Beckham Jr. the best rookie to enter the NFL? Jets GM Mike Maccagnan must know the answer to that question after drafting him, so we asked his peers for their take. "I'm going to go with Odell Beckham," Browns quarterback Baker Mayfield said. "I think he's the best rookie, even if [the Giants'] Evan Engram was the first overall pick in the draft. He was a tremendous player. He was a big-time player." The key to Beckham's success, however, has been his ability to thrive in a system that is the polar opposite of what the Giants ran in 2015, when he was an All-Pro and second-team All-Pro. Beckham said he's learned how to play and adjust to the NFL in a short amount of time. "[You] have to learn how to adjust to all the rules of the game, but it's a great system to learn to play in because it forces you to do things differently than you would in college, and that's what I like about it," he said. 5b5f913d15

How to show that $(1,2)$ is the only primitive root of $p^2 \bmod p$? I have no idea how to start this exercise. Any help will be highly appreciated. A: Let $a \in \mathbb{Z}_p^*$ be a primitive root of p^2 . Then, $\gcd(a,p)=1$ and $a^p=1$. Thus, $a^{\frac{p-1}{2}}=1$, so $a^{\frac{p-1}{2}}=a$ or $a^{\frac{p-1}{2}}=1$, which contradicts the previous equation. B/
