2015 Flyxcom ----- Privacy Policy: Terms of Use: lymph node dissection for gastric cancer in selected cases. With advances in surgical techniques, surgeons are faced with larger numbers of patients with advanced gastric cancer. If the operative methods used in the past can be improved, the postoperative complications can be reduced. We analyzed the clinical results of

laparoscopic lymph node dissection for advanced gastric cancer. From April 2000 to July 2003, 22 patients underwent a laparoscopic D2 lymph node dissection. The clinicopathological characteristics of these patients were reviewed retrospectively. The mean age was 61 years (range 37-75 years), and the male-to-female ratio was 1:1.3. The average operation time was 548 minutes (range 390-750 minutes), and the mean estimated blood loss was 550 ml (range 250-1200 ml 1d6a3396d6
