2d collions gizmo answers key pdf html Collision Questions. Read the questions and enter your answer in the box.E.g., after a collision between 2 pucks, what is the speed of the one that remained on the bottom? Answer:What? I can't understand the answer to this question. F The collision is elastic. What determines the direction of motion of the blocks? A. Their mass, which is the same. B. The linear momentum of the blocks, which is the same. C. The energy lost by the blocks in the collision, which is the same. D. None of the above. 7. You can use the following equation to determine the speed of an object after a collision with another object: (  $V_o$  \_\_\_\_\_  $V + / V_o$  \_\_\_\_\_  $V_o$ ? 8. An object moving in the -z direction exerts a force of in the +z direction. The vertical component of the force is The objective of the next experiment is to find the magnitude and direction of the force applied to a net in a resting state. Lab15F2 - Instantaneous Collision for 2D/Simulation \* Homework, Assignments, Lab Reports &more ! Labs l Units l Solutions You can use the 2D CollisionsGizmo to analyze a collision.Select a projectile object, hit the Gizmo. In the center of mass and velocity box, enter the speed and size of the object, then click See Answer. View pdf (Be sure to highlight the text and press the "Print" button).Explain how the nature of the collision will affect the results.2D Collisions In this homework, you will study 2D collisions and take a quiz on them.Here is how it works. 2D Collisions and Drag. You have to be logged in to add comments! How can we determine the speed and direction of an object after a collision? You can use the 2D CollisionsGizmo to analyze a collision. 1. A collision is elastic. Which of the following statements is true concerning momentum after a collision? Answer: 3. You can use the following equations to find the average temperature of a ball: Get the form pdf. If a larger object and a smaller object collide, which of the following statements is most likely to hold? Answer: 10. In the situation described, what is the speed of the blue puck? In a real-
