What's New In Smart Folder?

Smart Folder is a powerful PC utilities product to protect your files from being seen by everybody in PC. It works as a fully featured hidden file security software, based on Windows kernel level, that any software which run on application level (browser, explorer, chat, file manager, download manager, firewall,...) cannot see or execute your files protected by Smart Folder. If you want to protect specific files, folders, drives from Internet Explorer, Firefox, Opera, Chrome, Windows Explorer, AnyFileManager, Windows File Manager, Windows Desktop, Linux Desktop or any other File/Folder browsers, Smart Folder can be your choice. Smart Folder has an easy to use configuration dialog to set a file protection interval (0 to 999 days). It makes file/folder protection really easy and reliable. If your file is protected by just days, you can turn off protection and get back your files. If you need to make your file protected for 7days, you need to turn on protection first and leave it running. It's very safe solution for your protection. You can create several secure file folders to protect by days. File Menu Support Utilities Settings Language Setup Introduction SmartFolder is a revolutionary personal file security software product for Windows™ Platform. It is the world's first and only free window management software that works on the kernel level of the Windows system and provides full protection of secret files, folders, drives, and network resources. Please type in your email: To receive more information from FactoryDirectPro☐please leave your email. What is Kernel Level? Kernel level is the most difficult level between application level and

hard disk driver level. Application level means if you change the file in application such as download, save, open, your process can change the status of file. Like Virus or Spyware. This is the upper level than kernel level and user level. Hiding the files on hard disk, change the meaning of "file" can be called as hiding the files on hard disk. Kernel level means without being changed the file status at hard disk driver level.
