But I do not know how to convert the.dss file to the.json format. Please help. A: I found the answer, the style.setData function is used to add style for the specified component. Also it is for v-font, v-colors etc. And I want to show the data of the component on the front end, so I need the data that can be get by using the style.getData function. Creative Writing for the Obvious A few weeks ago, I posted a picture on Facebook of a ceramic tree on my desk at home. When I posted it, the majority of comments on the post said something like "Really? Ceramic?" "I guess I don't understand." "Why would anyone put up a ceramic tree?" So clearly, some of these people didn't get my point. I guess it was hard for them to see it. I use the ceramic tree as a prop in my writing sessions. A creative writing session is like a painter sitting down and

attempting to come up with a portrait of his characters. When you get right down to it, I believe that the most powerful way to tell a story is to simply write it. I don't write in any particular style. I just give myself a general framework to start and then I throw as much detail into the story as it needs, as if the story is unfolding
