If you are one of the lucky few who has been to the Library of Congress before, you will notice some new things. These changes, however, are more than additions, they are new ways to display some of the outstanding holdings of this institution. The lighting in the grand reading rooms is a dramatic and beautiful change from what the Library of Congress was known for. Pendants and chandeliers formerly hung from high ceiling beams in the exhibition rooms; today much of that has been removed. The grand reading rooms were once packed with people and a row of magnificent teak reading desks sat alongside the windows. Today, those high tables and the classic Library of Congress facade have been recast to create a more intimate, environmentally-friendly experience. The return of light to the exhibition rooms has been intentional. The Library of Congress believes that the high ceilings and dark and dusty
