Antiseptic agents in dentistry. Antiseptics are used to prevent the colonization or the growth of microorganisms, particularly the organisms that are responsible for dental caries and periodontal diseases. Antiseptics are also used to control endodontic infections, including secondary infection during the re-entry phase. There is a vast range of antiseptics and their place in dental practice is a reflection of the idiosyncrasies of the dentist. Antiseptics are divided into two categories: bactericides and virucides. Gram-positive, gram-negative, anaerobic and aerobic bacteria may be inactivated or the growth of those bacteria is retarded, with or without the presence of oxygen in the environment. Antiseptics may be used singly or in combination, depending on the organism, type of procedure and the site of application. The combination of antiseptics may include contact antiseptics, with or without

surfactants, and irrigating antiseptics. The majority of antiseptics are applied topically by rinsing, gargling or swishing. The efficacy of antiseptics depends on their physico-chemical properties and the physiological properties of the tissues. Some antiseptics may damage the tissues of the mouth or other tissues of the oral cavity. The use of antiseptics should be weighed against the likely benefits to the patient.

Atheist Rick Warren, preaching to the masses. Warren is a Yale trained preacher whose \$40 million house of horrors is a good example of why the California State Legislature is considering legislation to stop public funding of faith-based organizations. There's the whole Palin and pregnancy controversy, too – but there's something else about Warren. As it turns out, he's also a hard-core liberal, and a smart, rational one at that, but the media has done an excellent job of obscuring that by turning him into an infallible blow-hard. Under the guise of raising money for the poor,

---

Warren is funding, as Media Matters documents, a race-baiting, hate-mongering campaign geared at convincing the public that Republicans are waging a “war on women.” During one speech, Warren said: The Republican Party and the religious right ... are trying to turn women into objects ... They are trying to turn women into the little boxes that they’ve known all their lives they should

What's New in the?

English: If you have trouble understanding what people say then try to think of yourself in their place. You're in a seminar and a pupil is angry with the teacher because the topic isn't relevant to their own career. What would you say? He'd say: 'How can you question a teaching in which I am not taking part?' That is better than him answering with: 'The topic was completely irrelevant to my work so I just chose the one that

---

was the most plausible to me and you know what? It just happened to be completely off the point.' And he is right. But if you feel misunderstood then you should give the person making the accusation a chance to explain themselves. Let me put it to you another way: The idea of caring less about your career in order to make sense of a difficult topic is an admirable one. That way you will learn more. You could also explain to the teacher or the pupil that they really do want to understand, Spanish: Si te dicen que no puedes entender lo que dicen, intenta pensarlo como ellos. Eres en un seminario y un alumno está enojado con el maestro porque la materia no es relevante para su propio empleo. ¿Qué dirías? Él diría: "¿Cómo es posible que se cuestione una enseñanza en la que no estoy participando? Eso es mejor que acepte la situación y que yo diga: "La materia es completamente irrelevante a mi trabajo, así que simplemente elegí la que era más plausible para mí, y sabes qué?" "Simplemente

pasó que estuviera completamente fuera del punto". Y él tiene razón. Pero si te sientes malinterpretado, entonces deberías darle a la persona que lo cree la oportunidad de explicarse. Deja que te ponga las cosas de otra manera: La idea de no querer ser tan preocupado por tu carrera para entender un tema difícil es admirable. Ese es el cam
