Solution: More information about installing Autodesk Revit on multiple machines can be found here [Autodesk Revit](#) See also: [Revit Overview](#) Prices have risen this year, but the new student tuition fee still remains the same. Inflation has increased the cost of living for those studying at university, but the new student fees have remained static at £9,000 per annum. The increase in the cost of living means that, if the graduate remains in full-time work, they could have paid more than £4,000 for their education in 2017 than they did in 2008. Annual inflation is one of the reasons the average price of tuition fees for a full-time undergraduate degree has risen from £2,401 to £9,000 over the past 11 years. The average student at Cardiff will now pay £5,400 for the academic year, while the average student at the University of Southampton pays £5,200. Inflation has also increased the average price of living in the UK, which will impact many students. The average cost of a typical two-bedroom apartment now costs £733, £25 more than the price paid a decade ago. The price of food is the biggest driver of higher living costs for students, with it expected to cost £715 per year for the next academic year. This includes renting a house for £1,340 and buying a weekly

meal at McDonald's for £4.40. The cost of living in Birmingham will be £3,360 for the academic year, and in London this rises to £3,490. However, the cost of living has reduced in Durham (from £3,270 to £3,060) and in York (from £3,540 to £3,390). In terms of average salaries for graduates, the salary they will earn has increased by £2,400 in the UK, which will come in part as a result of increased inflation. However, graduate salaries have decreased in Dublin, where the cost of living has increased, from £2,400 to £2,510. The rise in living costs means a
