I used this tool for a year now and it can do everything I need it to do with ease. Its my goto database design tool ever! It does require a bit of a learning curve but once you are there its awesome. Designing database structures, is not something for novices. When I first started using MicroOLAP I was thrown into a difficult situation. Having to design the database for a university, that required it to be relatively small and dynamic. But that is impossible when designing a small website, it doesn
