What's New In Medical Chart Plus?

Medical Chart Plus is a powerful suite that was created to provide doctors with a simple means of managing large patient databases. The electronic medical records program provides a secure environment for keeping track of patient personal information and includes customizable templates that will fit the specific needs of most practice types. Users can easily create patient charts, add medical history, and export to electronic billing and medical record system. Medical Chart Plus includes medical record tracking, customized templates, and data entry that will provide a simple solution for your practice. Medical Chart Plus Product Features: - Feature-rich database, data entry and medical charting software with a full range of preloaded templates. - Powerful application development tools and components for adding your own database and forms to the system - Flexible database management system allowing you to create new databases and add and delete forms and reports. - Automatic generation of patient demographic data - Electronic billing and medical record system - The report form is a critical tool allowing you to generate easily a complete array of diagnostic and treatment reports including: treatment summaries, medical charts, inpatients reports, outpatients reports, diagnosis reports, readmissions, and care plans. Medical Chart Plus Installation & Setup: Setting up Medical Chart Plus is an easy process. Download the setup file, unzip it and run the executable. The entire installation process takes less than 30 minutes. It will also guide you through the setup wizard and help you to create the appropriate configuration files. After you've installed Medical Chart Plus, you can start using it immediately. The first time you open the software, you will be prompted to create an account or you can use the default account. After you've set up your account, you can go ahead and import your data. Medical Chart Plus is a relatively easy program to use and we have demonstrated the basic features during our webinar. For example, you can create a chart in a matter of minutes using the creation tools, however, you may need to custom build your forms or database. Our tools will help you with this. Medical Chart Plus offers a nice set of customization tools, however, you will need to spend time with them to see what they offer. In many ways, Medical Chart Plus functions like most electronic medical records programs. We've listed the different aspects of the system in order to help you in your evaluation process. You can also take a look at some of the screenshots, detailed instructions or sample database for additional help. Patient Demographics (Patient Detail) We have included a special section within the database that allows you to store patient information (e.g., patient name, address, etc.). In this section, you can enter a variety of information, including patient demographics. We have added a unique feature within Medical Chart Plus that allows you to store patient information in an Electronic Health Record (EHR) compatible format. You can import data using a
