Picture Perfect by Grafik Gear is a powerful enhancement tool. It allows you to flatten images, enhance surface smoothness, remove all kind of digital noise, improve line and edge antialiasing, remove blurred parts, add glow, sharpen, and enhance colors. You can also apply image "Sharpening" and "Filter" options to enhance the image. If you have another

photo enhancement software, then you can transfer the options from that software to Perfectum. You can use the "Select Region" option to select a region of your image. Download: Lumiera digital camera technology designed to automatically correct for all blurs found in a camera lens and eliminate the appearance of digital noise. The Lumiera Digital Lens De-Noising Filter is the only lens de-noising

technology to make a difference between the photographer's ability and the camera's lens technology. Using information gained from analysis of the lens optics, the Lumiera technology automatically corrects most lens distortions, vignetting and crosstalk so that the image you see on the camera monitor is much closer to what you see on your computer monitor. The best digital images are clear, sharp, and free of digital noise.

This is impossible without the camera's lens optics. Unfortunately, the lens optics often introduce the most severe distortion, vignetting, and crosstalk effects. With the Lumiera Digital Lens De-Noising Filter, the only lens-related de-noising filters which automatically correct distortions, vignetting and crosstalk, you see what is possible with a lens without having to make any adjustments
