Project Timer

KEYMACRO is a keyboard macro utility developed for Windows 7 and 8 to help you create keyboard shortcuts and macros for common tasks. Simple and easy to use KeyMacro can be used by anyone who wants to assign a keyboard shortcut for performing a common action on a computer. You only need to enter the command you want to create, and then press the

---

hotkey (the left key that would work if you were using a laptop keyboard) that is associated with that action. There is no need to configure anything else because the tool performs all the required steps automatically. You will be notified by the program when you have completed the task, but you can also create a command manually. There is no need to use Windows and start the application in order to create keyboard macros because KeyMacro does the job with no problem. Supported commands

---

KeyMacro can handle mouse commands, as well. The software supports creating keyboard macros for the following actions: Open the selected document Open a specific folder in Windows Explorer Move the selected item to a different folder Copy the selected file or folder Move the selected file or folder to a different folder Select a specific word or a specific line of text within a document Copy the selected text to the clipboard Paste the selected text Open the selected image file Print the selected

---

document Change the active  
document window to the selected  
document Create a new document  
in the selected folder Create a new  
folder in the selected folder Create  
a shortcut to the selected document  
Move the selected item to a  
different folder Create a shortcut  
to the selected file Copy the  
selected text to the clipboard  
Create a new document in the  
selected folder Create a new folder  
in the selected folder Create a  
shortcut to the selected folder  
Create a shortcut to the selected

---

file Execute a selected command  
Copy the selected text to the  
clipboard Create a new document  
in the selected folder Create a new  
folder in the selected folder Create  
a shortcut to the selected folder  
Create a shortcut to the selected  
file Execute the selected command  
Clear all text on the clipboard  
Open the system tray Copy the  
selected text to the clipboard  
Create a new document in the  
selected folder Create a new folder  
in the selected folder Create a  
shortcut to the selected folder

---

Create a shortcut to the selected  
file Execute a selected command  
Copy the selected text to the  
clipboard Create a new document  
in the selected folder Create a new  
folder in the selected folder Create  
a shortcut 1d6a3396d6

### What's New in the?
