Hello, I am going to work on a VIP Add-on but at the end when I'm already on working and the update is... May 23, 2020 5. Don't know. If your apply to VIP that bad. I got VIP only for the new client. For more details read the rest of this and/or watch a video at: May 17, 2020 I am making a VIP thing for people that dont play servers and prefer to play solo, the feature will be similar with a

few extras as well. The idea is to be able to play servers as a VIP but have all the features of a normal server, so the server admin can set the rules and manage the player that is doing VIP... May 14, 2020

VIP's will have to be able to join legit servers as an admin and they will share the server adm(admin) the rest of the players being moderators and regular players only. So if you're the adm and you set the settings, everyone else will be regular players. May 5, 2020 After scanning the other thread on the topic of VIP's I'd like to make this thread more relevant to other

VIP's. Currently I've only scanned through this thread, as I am currently trying to fix my own addon to make a VIP. There has been a number of discussions on whether or not it is possible to make a VIP addon, and I'm not sure how well it is going or what the best way to go about it is. I've found this thread, which makes me wonder if I should make it work like you start as a normal player and gain the admin rights

through gaining certain points. I've yet to look at the code. May 4, 2020 User: Zero4 The way I've done it is to create the set in code, pass in an unsigned long, get the id for it, and if it's in the server then render it. There was no business logic, it was really just check if the player's id was in the server and then if they

How would I know whether this is a prebuilt, as opposed to custom-built, plugin? the only thing is how would I go about installing it? the unofficial instructions for using it with the mod were on a different site, but none of the links are working This plugin gives the user the control to change his settings by himself (display, system, model and how many rounds and time to activate his vip, description, action_sets).
