\* \*\*The Photoshop Design Gallery:\*\* This photoshop tutorial site at [www.photoshop.com/tutorials/](http://www.photoshop.com/tutorials/) teaches you to create a logo from scratch, add filter effects, and more. \* \*\*The Photoshop Elements 6 Tutorial:\*\* Here are both beginner and intermediate tutorials for creating a greeting card and adding photo effects (with new, easy-to-use tools). \* \*\*The Photoshop Creative Suite 6 Tutorial:\*\* This site illustrates how you can use Photoshop's tools, layers, and adjustment layers to create a beautiful photo title or add vignettes to a landscape photograph. If you're looking for a book that presents Photoshop in an easy-to-understand way, don't miss the several books in *The Photoshop Book of Secrets*. I can't imagine getting around to learning how to use any application without first reading this book. ## Digital Photography If you're interested in creating or manipulating digital photos, then you'll want to have access to a camera that saves its images on removable media. I recommend the Canon EOS Rebel T1i. Its largest capacity, removable memory card is the 16GB model and is plenty to capture the images you'll need for this book. But if you want to go even bigger, then there's a 32GB version of this card in the new Canon EOS Rebel T1i. You can also go digital with your photos by using a camera that captures files that you transfer to a computer, like a digital camera, DSLR (or camcorder), or phone camera. After you transfer the images to a computer, you can use software to enhance them (pardon the pun), such as Adobe Photoshop Elements or Photoshop. But to get started using Elements, you'll want a computer system that can handle the software's basic functions, like creating and saving projects and viewing images. ## The Basics of Photoshop Photoshop's overall layout looks like Figure 1-5, but its workspace is called the *canvas* and it changes according to the screen size, whether you're viewing the documents full-screen or in a window. In the lower left, where the Command and View options usually reside, you see the Camera Roll browser. Figure 1-5. The steps of almost every Photoshop task begin with the Shoot New command (Shoot→New), which saves the image to a canvas. When you select the Shoot New command, you see this window with options

### What's New in the Adobe Photoshop 2020 (version 21)?

In the beginning there is only humanity, then humanity evolves into great beings as the galactic civilization of all galaxies. These beings are the high teachers/masters that help humanity evolve. They tell humanity how to live, what to do, what to think of the future and the past. They give us the simple rules of the galaxy. There are many Masters, even today, but what to know who are the different personalities of the messengers that will guide you in all matters of life? What do they want from you? I will try to learn about the Masters from God himself, then I will draw a comparison with each other. When I see that I will say what personality trait they share, or what comes from our galactic culture. You know the hair style is so accurate that I will give you a simple definition of a hair style you will recognize. The Hair style I speak about is the tangent. See the hair style for the next picture. Galactic Culture (1) God is one of the supreme entities in the universe, the creator. The creator gives life to each of us. We are living in that potential, in the conscious universes. God created the beings that are called galactic beings. The most important of them is he himself. These are the grand masters of the universe. They come from many families and they look very different, but they have the same characteristics. They all are always present in history, they are the messengers from God. They look around and watch what the universe is. What we are doing? What are our thoughts? What are our emotions? They observe us, they give us advice. The whole cosmic body wants to evolve, to learn more. They are the ones that tell us how to evolve. And God is the best teacher, the best example. He is always giving advice to our society, he is the high teacher, the great father figure and mother. When the galaxy has become advanced, when the beings have evolved to the highest level, the galactic beings look at human beings and observe their lives. They see that there are physical and spiritual beings. They see that our ancestors were not as advanced as we are today. They realize that human beings are to be taught something important. They realize that it is not enough to learn how to live, but they also have to learn how to think. The beings became aware that the best teachers are the great teachers, the ancestors of humanity. They realize that we still have to learn about love
