

---

Godot's documentation is available in multiple languages and versions. Expand the Read Documents panel at the bottom of the sidebar to see the list. You can read the documentation, which is usually located in the /docs directory in the directory where you hosted your game. However, you can read the documentation that is stored in the directory where you have placed your project or the directory where you have placed several projects. If you are not located in a directory that contains many projects, you can use the `-dpfile` option instead of `-f`.
