Export the data
to .CSV, .INF

and .SQL formats.

2. Import records
from .CSV, .INF

and .SQL formats.

3. Convert
between .CSV, .INF

and.SQL formats.

4. Connect to multiple databases (e.g. MS Access, MS SQL, MySQL) 5. Edit and create different groups to store your personal information. 6.

Protect your
personal
information and
get multiple
passwords. 7.
Clear default
fields, make
changes, or
modify existing
categories. 8.
Set a custom

password to
protect the
database. 9.

Backup and
restore database
10. Use safe
locks and
passwords to stop
any unwanted
activity on your
computer. 11. An

intuitive and
self-explanatory
interface 12.

Edit and create
different groups
to store your
personal
information. 13.

Import records
from.CSV, .INF

Keymacro is a
completely
different
keyboard macro
application with
quick-access to
any keyboard
button you
desire. Features:
Quick-access to

any keyboard
button: The app
is designed to be
used with any

InfoSafe Plus
allows you to
create, manage,
and protect
multiple
information
categories. As a
result, you can
quickly and

easily find files
that you need.
With InfoSafe
Plus, you can
quickly and
easily create,
manage, and
protect multiple
categories of
information such
as credit cards,

passwords, bank
accounts,
software,
insurance
policies, and
more. You can
quickly create,
manage, and
protect multiple
categories of
information such

as credit cards,
passwords, bank
accounts,
software,
insurance
policies, and
more. The

categories are:

Credit cards:

Full name of card
holder Card

number PIN number
Type of card
(Visa,
MasterCard,
American Express,
etc.) License
plate Date of
expiry Bank
provider (Visa,
MasterCard,
American Express,

etc.) You can easily search for records based on the fields. The categories are alphabetized and you can filter by field. For example, you can filter by date or card number to

view only your credit cards or license plates. The program has an import function so you can quickly import your files from other databases. You can also export

your files to various formats such as *.CSV or *.ISV. You can easily create, manage, and protect multiple categories of information such as credit cards, passwords, bank

accounts,
software,
insurance
policies, and
more. The
categories are:

Credit cards:

Full name of card holder	Card number	PIN number	Type of card
-----------------------------	----------------	------------	--------------

(Visa,
MasterCard,
American Express,
etc.) License
plate Date of
expiry Bank
provider (Visa,
MasterCard,
American Express,
etc.) Password:
Password you set

for the
application
Password you set
for InfoSafe Plus
database Password
to be used when
you import files
from other
databases (see
also "InfoSafePlu
s-Format import")

Password to be
used when
exporting files
to various
formats (see also
"InfoSafePlus-
Format export")
InfoSafe Plus
allows you to
