This app syncs your files online (like iTunes) so you can access them from anywhere, even on your mobile device if you connect to the internet. It also supports Gmail, Yahoo, AOL, Hotmail and other email providers, but I never tried it on those. This app is very easy to use, but you can't access any types of encryption

I would have rated this 5 stars, but I can't when the free version of the app has ads. I'm not happy. Rate this application for your security I found this application to be quite useful.
