History In 1980, Autodesk was founded by Don Bobrow as a five-person software company with a \$20,000 investment. Bobrow had worked for Digital Equipment Corporation and had co-authored the first publication of the MIT Graphics Laboratory, Digital Drawings, Graphics & Graphical Images, in 1971. Autodesk's first product was AutoCAD, which was first released in 1989. In March 1991 Autodesk (then branded as ABBYY) acquired the rights to AutoCAD, AutoCAD LT and DeskMetrics. Autodesk originally shipped AutoCAD Release 2 with 2-bit graphics. AutoCAD Release 3 and 4 contained 256-bit color graphics. With AutoCAD Release 6 (1993), AutoCAD introduced a new drawing engine, text and word processing, photo printing, shape drawing, 3D and 2D-to-3D printing. With AutoCAD Release 16, they added DXF support. In 1996, with Release 16-1, a GUI was added. In 2000, a completely new interface was released with AutoCAD 2000. The following year, AutoCAD released AutoCAD 2000 DWG, which was a separate product. The first version of AutoCAD to use the latest Autodesk API, Autodesk Software Developer's Network (SDN), was released in 1997. The first version of AutoCAD to use AutoLISP was released in 2000. AutoCAD 2007 included a 64-bit architecture, and supported many new file formats. AutoCAD 2008 was released on Microsoft Windows (XP and Vista), macOS and OS X. AutoCAD 2009 included the first update since 2008, and featured the integration of AutoCAD DWG with Windows Vista Aero and AutoCAD Architecture. The AutoCAD Product Team has published several lists of noteworthy changes and updates, including AutoCAD 2009 (Windows)

Marine Le Pen, the leader of France's far-right National Front (FN), has attacked Emmanuel Macron's frontrunner status in the French presidential election, declaring that "the country needs a political revolution," and that the current president "must be sent to prison." "The country needs a political revolution," she told supporters at a rally in the southern city of Nice on Monday evening, amid concerns that Marine Le Pen's popularity may be waning following the announcement by centrist candidate Emmanuel Macron that he is to lead the country's two main political parties in the upcoming presidential race. Le Pen also lashed out at the "hypocrisy" of Macron's bid to lead the French people, declaring that the current President is "a complete fake." "It is up to the French to decide, but Macron should be sent to prison for this. He has never done anything, he is a complete fake," she added. An animated Le Pen also demanded "the formation of a new party" following last week's announcement by Macron, who comes from a family of wealthy French bankers, that he intends to lead both of the country's major political parties in order to ensure that he is the only candidate on the ballot in the two-round presidential vote, scheduled to take place on April 23 and May 7. Speaking in the French town of Saint-Raphael on Sunday, Macron declared that he "will be the candidate of the Republic for the presidential election. I want to be your president to be an answer to the country's problems, not a solution to them," adding: "The only way to defeat the National Front is for the French people to rally behind me as their president." Le Pen, who took her own place at the top of the French political polls in early 2016, has since tightened her grip on the running, with recent polls now showing her neck-and-neck with Macron, with her support dwindling to less than 20 percent. "It has taken all the efforts of the National Front to ensure the Front, and not just the party's electoral prospects, are in the best state possible," explained Nathalie Arthaud, the party's communications director. "Given the level of attacks by Mr. Macron and the extreme right
