MSNPlus is an easy-to-use application that will provide a better experience for users of groups.im on Windows Live Messenger. It enables prompts for group alert of groups.im while avoiding harassment. Moreover, MSNPlus can also add functions as Screen Capture, Photo Express, Enhanced File Transfer for Messenger, making it more convenient and user-friendly. Group

What's New In MSNPlus?

When you log into Messenger, and see an invitation to add a new group, you can usually add it and meet the group right away. But sometimes, you are not sure what is the best group for you to add. If you are in such a situation, you can simply start Messenger, and right click a group to add it. MSNPlus will then automatically add the group for you. Furthermore, you can add or remove groups easily using MSNPlus. After you added a group, you can also edit the "Details" of the group, such as group description. Moreover, you can edit or view the group photos and the group "News". Features: You can also add or edit "Photo albums", "Favorites" and "Interests" for your group. You can use MSNPlus as MSN "Group Message" Alert, and it will prompt you to add the group for you in the status bar of Messenger. If there are any ongoing "groups" you can avoid seeing the group alerts. Moreover, you can view the photo "album", "favorites", and "interests" for the group in MSNPlus. You can also select the "Self-Destruct" of a group when "Send to Self" "groups" is turned on in Messenger. Moreover, you can create an "Alarm" for the group, so it can remind you of the group or the group activity. Requirements: - Windows 2000, Windows XP, Windows Vista, or Windows 7. Limitations: - The group manager is a utility that runs on "personal" Messenger in Windows. - The group manager is not compatible with "public" Messenger in Windows. Version history: 1.0 &n
