AutoCAD Crack Free [March-2022]

History AutoCAD was first developed in 1981 by Al Larson. It was originally available on a Sun workstation running a M68000-based microcomputer (Sun-3 series). Autodesk claims that as of March 31, 2010, AutoCAD 1.0 (Auto Drafting Software) has been used by a cumulative total of more than 7 million users worldwide. AutoCAD is currently available for the Windows, macOS, iOS, and Android platforms. As of June 2018, there are versions for 64-bit Microsoft Windows and Linux operating systems and 64-bit macOS. The first version of AutoCAD, Auto Drafting Software, was released in December 1982, and the first Macintosh version was released in June 1983. The first version for the iOS operating system, AutoCAD LT, was released in June 2005. AutoCAD 2013 and newer versions are available as a mobile app. AutoCAD LT was first released in 2007. AutoCAD was originally written in BASIC, but has also been written in C, and can currently be written in C# and Visual Basic. Users often use the word "AutoCAD" to refer to the entire CAD suite (AutoCAD, Inventor, and Plant), because of the popularity of these applications, and because they run on the same operating system. "AutoCAD" can also refer to the primary AutoCAD application, which has a number of related AutoCAD LT and Inventor plug-ins. AutoCAD LT is the software for users who wish to work with drafting-related file types, including most DWG, DXF, and DWF files; AutoCAD LT is commonly referred to as AutoCAD LT or AutoCAD LT Pro. AutoCAD is the only application that can open and save files in all three file types. AutoCAD LT is no longer supported by Autodesk for new projects. On September 17, 2017, Autodesk announced that AutoCAD LT would be discontinued on April 18, 2018, with the last update for the software version 15.5. AutoCAD 2017 is also discontinued as of April 18, 2018, with the last update to AutoCAD for 2017 version 19.0.2. As of version 24, Autodesk discontinued support for both Windows and Macintosh versions of AutoCAD. As of December 5, 2019, Autodesk discontinued support for Windows for AutoCAD R19.
