Informations Downloads Search Download Prevent unauthorized duplicating of software: Create crack, keygen, serial number, registration code, key generator, pirate key, key maker, license key, activation key, offline key, web key, warez full version... All the versions, language and country of Safarp are forbidden. Ordering from the link above is allowed.Q: How does RestSharp deserialize complex JSON into a class that has a list of objects? I have a class class cMember { public List Members {get;set;} } How do I write a RestSharp function that will deserialize the JSON code below into a cMember object? { "members": [ { "firstname": "John" }, { "firstname": "Paul" } ] } Thanks. UPDATE: I have figured out how to do it manually. Now I want to be able to use RestSharp to deserialize the following JSON into a cMember object: { "foo": { "bar": { "baz": "foo" } } } I am trying the following but am getting an error: public void Foo() { var client = new RestClient(""); var request = new RestRequest(""); request.Resource = "/member"; request.Method = Method.POST;
