**Municipal Borough of St. Pancras** St. Pancras was a local government district in the metropolitan area of London, England from 1900 to 1965. Its council area covered the area now included in the London Borough of Camden. The district was created in 1900 under the Local Government Act 1894 as St Pancras Urban District, an area split from the Metropolitan Board of Works to form a separate borough. The local authority was St Pancras Urban District Council, which consisted of one elected mayor and fifteen councillors. In 1938, the local authority was reconstituted as a municipal borough. It was merged with the Metropolitan Borough of St Pancras on 1 January 1965 to form the London Borough of Camden. The last mayor to be elected directly by the residents was Richard Baynham-Hall. In 1901, the area's main railway station was built to a design by Charles Fowler, that was extended in stages until 1929. It is now the St Pancras Renaissance London International Airport. The ancient parish church of St Pancras, designated Grade I listed, was originally built in the 11th century as a church for the village of St Pancras but became a parish in its own right in the 14th century and was enlarged and redecored in the 15th and 16th centuries. The church was rebuilt in 1845, extended in 1863-65 by John Oldrid Scott, and is a Grade I listed building. The site of St Pancras Old Church is now occupied by the British Museum.

**Subjective autonomy and perceived social support in critical care nurses.** The purpose of this study was to examine the relationship of subjective autonomy to perceived social support in critical care nurses. Critical care nurses care for and with patients who are often at the end of life. Because nurses are typically faced with high-stress situations on a daily basis, the opportunity for a sense of empowerment and social support may be limited. I then build my app and ran it on an emulator. It ran fine. I then tried the "Android" simulator and it says "Cannot read property 'mount' of undefined" when I run it. I installed Android Studio and tried to run it in that and it says Failed to open android sdk manager I tried closing the Android Studio for at least 10 mins and tried to run it again and the same error persists. I ran "react-native run-android" in the cmd line. It works fine in that.
