What's New In Send Mii?

Send Mii is a small and easy to use application that can be used to quickly send emails to your email id and store info. This is a new way of Cloud Computing, Cloud Messages to store info! Features: One of the unique features that set us apart from other similar applications is the ability to send a "Random" message to your friends, with your email address. Send Mii can send emails for you to your friends or you can choose to send the email to yourself. In addition to the email sending feature, the application also has an SMS sent feature. Versions: Send Mii has been available on Android since the beginning but since the developers are working on a web version of the application for easier usage, the version available for android is Beta, which does not have all the features of the full version. The version on the android platform does have the email sender and sms sender. Additions: We have added more features that make the application better for our users. Feedback: Please post your comments on this version in the comments on this page. How To Use: 1) Open the application and select your email 2) Select the option "Send to myself" or "Send to my Friends" to send an email or send an SMS 3) Select the message you would like to send 4) Select the person you would like to send the email to 5) Select "Done" to complete the process. Bug Reports: Please report any bugs and feature requests here. We will be checking the bug reports on a regular basis and try to fix any bugs and add any requested features. Credits: Send Mii was created by the friendzilliq team. Google Play Repository: Source Code: We are always open to accepting patches and ideas from the community. Changelog: 0.3.8 Version 0.3.8 added the ability to install on your sd card, added contact searching, fixed a number of bugs and left over issues from the previous version. Bug Reports: 1) Need to click "Register" button on the home screen to send a message when I would like to send the message from the message box directly. 2) Recipient's email address is not displayed on the message box, even when I use "Add Email Address" button.

System Requirements:

Mac and Windows: - OSX 10.5 or later - Win 7 or later - Windows: 32-bit Intel and AMD compatible systems (32-bit compatible Windows operating systems) - Internet Explorer 7 or later - Windows Media Player 11 or later - Adobe Flash Player 11 or later For Windows XP: - Windows XP Service Pack 2 or later - Flash Player 10 or later - Adobe Flash Player 11
