Disadvantages Although Photoshop has a user interface that is both highly effective and easy to use, some people find it very complicated to learn. If you are beginning a career as a graphic designer, you will want to learn to use Photoshop with the widest variety of images. Adobe Photoshop also has a steep learning curve, and as a beginner, you will need to spend a lot of time playing with features and tools to discover what is possible. Photoshop's learning curve is so steep, in fact, that experienced professionals have to be paid anywhere from \$75 to \$150 an hour to perform basic tasks in Photoshop. Photoshop's steep learning curve also has a negative effect on beginners. It is difficult for novice users to feel comfortable using Photoshop because they don't understand the tools and settings used. At times it seems as if Photoshop is more complicated than other editors. In addition, Photoshop can be a little confusing. Teddy Bridgewater's injury is worth watching MINNEAPOLIS -- If you're wondering whether Teddy Bridgewater can be the next Peyton Manning (or be nearly as successful as him) it's hard not to notice the troubling injury he's had in recent years. The New Orleans Saints selected Bridgewater with the 32nd overall pick last year, and if he doesn't develop into something special he'll have to endure the kind of "I'll be back in three months" jokes that will follow all potential No. 1 overall picks for the majority of their careers. The frustration that comes from seeing the past versions of Manning, Rodgers and Brady on your team is tough to overcome. Teddy Bridgewater's ability to compete is a huge reason he went No. 1 overall in the draft a year ago, but his injury history has been a thorn in his side. Jason Miller/Getty Images Imagine if the NFL had a "disabled list" and Bridgewater, or any player you drafted in the top 20 picks, couldn't practice and didn't make it into training camp because of some stupid violation that didn't even matter. It could happen. It's been that way for as long as the NFL has been around. I knew the Vikings would be smart to sign Bridgewater to an extension before last season even began. I just didn't expect things to turn out like they have. The Saints are a mess with Drew Brees, one of the best quarterbacks in the game at 35 years old. They have No. 1 wideout Michael Thomas, who has the ability to make plays on any given play. They have receivers who are two or three years younger than Bridgewater and if I'm Bridgewater, I'm just wondering why I'm even on the field. I was watching my first three games of the season and checking out the Saints in action on YouTube the other day and this is what I saw: I'm not saying this because I'm trying to play under the radar, but the Saints are incredibly bad. Their defense is allowed to go back and forth between playing "off" and "on" the film, which is very indicative of what they look like in real life. They have a really good offensive line that has to pull itself out of a hole after running the football about 130 times a game. Offensively, they're in a perpetual shootout with no end in sight. Brees isn't playing with his typical calm and leadership, receivers are dropping balls and defenses are changing the
