Oridonin triggers caspase-dependent and -independent apoptosis in B cell lymphoma cells. Oridonin, an ingredient of traditional Chinese medicine, has been shown to have cytotoxic activity against various types of cancer cells. The aim of this study was to investigate the mechanisms by which oridonin exerts its cytotoxicity in B cell lymphoma cells. The inhibitory effects of oridonin on lymphoma cell growth were determined using the MTT assay. As to the modes of cell death induced by oridonin, apoptotic cells were detected by flow cytometry and morphological analysis of apoptotic changes.
