# Lingo Crack+ (April-2022)

Lingo is an original symbol set inspired by the retro feel of pixel art and designed for personal desktop use. Lingo is a desktop feature that features beautifully hand-crafted and polished icons. It uses the same thought process and creative workflow that goes into my artwork for my client-based works. I have refined the approach over the years and I am proud to share Lingo with my fans. The Lingo set contains over 1,000 icons, and each icon is built by hand using the same color palette and creative approach that I use for my client projects. I will not be releasing any more sets or publishing any more works, but the Lingo set is meant to be a window into my creative process and is a limited project that will never be re-released in a larger set.
