Keyboard Macro recorder - Recording keystrokes is the most useful feature of this application. Once you install it on your Windows system and set up the parameters (which can be done quickly and easily), you are ready to record whatever you want with a single keystroke. It supports almost all common keyboard layouts, including US, UK, French, German, Japanese, Simplified Chinese, and many other keyboards. Moreover, it has an Auto Key Method, which can detect keyboard shortcuts automatically and save them. This means that you can record keyboard shortcuts directly without the need to configure. The application also supports hotkeys, hotstrings, and mouse clicks recording. When configuring Keyboard Macro, it also allows you to control the area of recording by using "Tracking area." This feature will not record keystrokes from the button area of the mouse pointer. Instead, it will monitor only the selected area. It will not record keystrokes from that area, thus you do not need to move the pointer to the area of interest. Keyboard Macro allows you to record keystrokes in a very flexible way. You can set the area for recording, and the keystroke(s) you want to record. You can also record specific window and control in the system. With Keyboard Macro, you can even record all keystrokes, including system events, while you are using the Windows system. In addition, you can also set up keyboard rules. Keyboard Macro can apply keyboard rules such as: Type Macro Only, Don't Type Macro, and Auto Type Macro, and you can do this not only for special keys but also for other rules. In this way, you can record keystrokes only for the specified rules and remove other keys that you do not need. Keyboard Macro can support the Windows 8 operating system with full function. In addition to "keyboard shortcuts" and "auto key," it also supports "hotkeys." You can even create hotkeys and hotstrings in the same way as keyboard shortcuts. This makes Keyboard Macro an invaluable tool for those who want to record and use a single keystroke to perform multiple functions. The recorded data are saved in the Windows System Clipboard, and you can even copy these data directly to the System Clipboard for easy pasting. To further facilitate the use of keyboard macros, Keyboard Macro also supports several other hotkeys, including: Clicked Window, and Selected Window, and other hotkey options. You can 77a5ca646e
