What's New In O O AppBuster?

Uninstalling or repairing Windows 10 is much more complicated than it needs to be. When your PC runs out of space, you might think that the best thing to do is to reinstall Windows. But, Windows 10 comes bundled with a lot of pre-installed apps, and many of them are not as easy to uninstall as other third-party apps. Furthermore, there are

---

plenty of third-party apps that can be installed alongside Windows 10, and they cannot be uninstalled. As a result, you might end up having a lot of apps on your PC that you don't need and don't use. But, there is an easy way out: you can uninstall built-in Windows 10 apps easily. Most of them cannot be removed using the normal methods, and these apps can even get in the way of your workflow. To get rid of built-in apps, you normally have

---

to use various PowerShell commands, which is not something most users want to try. A better way to uninstall built-in Windows 10 apps is to use an application that will do the job more efficiently and easily. The app that does just that is O&O AppBuster. It scans your PC and shows you all the applications installed on it, including those bundled with the OS and the ones installed from the Microsoft Store. Then, it allows you to remove any of

---

them easily, even the hidden ones. You can even uninstall or repair Windows 10 if it becomes damaged, thanks to its built-in Repair function. After you install the app, it will find and fix errors in Windows 10, even if you don't have a Restore Point. To uninstall all built-in apps, simply select one or more of them and click Uninstall. After confirming the action, the apps will be removed. The app will also allow you to clean up a list of installed apps and repair Windows

---

10. Features: Installs all pre-installed apps  
Uninstalls built-in apps  
Includes an uninstaller and repair function  
Removes all pre-installed apps
