In a blog post, the entrepreneur discusses a trip to San Francisco and explains the importance of his product as a personal helper for the beach. You don't have a micro-SD card slot, but you can expand the internal memory. Also, when it comes to data transmission, the application is limited to 3G. Jobs also points out that the phone has a good battery life. So you can use it as a personal assistant, for up to 4 days. In principle, the software is a simple means of image building, with no option to use the canvas in a more realistic way. Use it mainly as a fun tool, a good way to practice with colors and shapes, but maybe not to take it serious. In order to create a realistic image, you have to download a lot of photo manipulation programs. But there is an other, easier way to create a realistic image, just as you would do it on your own.
