The screensaver will create a relaxing atmosphere when your computer is idle. Double Bubble is a screen saver for windows XP, 2000, 2003, vista, 7, 8 and windows 10. The Double Bubble will randomly change the theme you are looking at on your computer screen. The themes include, hard rock, classical, soft synth, country western and different modern themes. This is a slow changing screen saver for your computer. You can change the themes by clicking on the changing menu when the desktop loads. If you choose a new theme the background wallpaper will change to the new theme. The screensaver loads from the factory, so it is slow to start. Also, the screensaver doesn`t have a sound, unless you play your own music in the background. The beats per minute can be changed to speed up the actions. Only the icon for the screensaver will be on your desktop, and the action will be slow. Double Bubble consists of two screensaver stages. The initial stage has all the sounds and action that includes the swirls, waves and bubbles from the beginning. As the screen saver continues it will slow down the action and change the sound. It will then change back to the first stage, and the entire screensaver will go through the cycle again. The second stage is a slow version of the first stage. A menu of music will be presented so you can pick and choose your favorite music to play as the backgrounds, waves and bubbles cycle through. Finally, the music will play for an extended amount of time. Double Bubble is compatible with Windows XP, 2000, 2003, vista, 7, 8 and windows 10. It has a little down sides, but overall it is a fantastic screensaver. It comes with a lot of cool features, including a 3D bubble screensaver that would actually last for at least 5-10 minutes, if not more, and I don't want to stop because it is so enjoyable. The graphics in the screensaver is of very high quality, along with a very nice ambient noise. Overall, this is a very good screensaver, and I am almost jealous of those who will get to use it for free. It is very good and I definitely recommend it.#!/usr/bin/env bash # Summary: Read the hubot-config.json file, and: # * export hubot:set TAG_FOR_FORK # * export hubot:set STAGE_FOR_FORK # * export hubot:set HUBOT_FOR_FORK # Read hubot-config.json file, and # export various helper functions as $foo:set BAR DIFF="diff --git" if [! -f hubot-config.json]; then echo "Creating default hubot-config.json for hubot-issuebot" echo "
