4.3.1 -> 4.4.0\+ u2k4/u3k5\+/u4k1\+ -> u4k2 most of the data (tiles, sprites, sounds, movies) have to be redistributed to the new format. This keeps games compressed, and saves space on the disk. Most formats contain an index file that points to where the data is located in the disk (1). Programs that are aware of the new format can load these games faster than the older ones. A program that is aware of the new format is not aware of the specific game so a generic "new format" could be used across all the games. A tool was released to perform the conversion between the old and new formats (2). (1) The files are identified by a GUID that identifies where in the disk the data is located. This index file can usually be found in the disk (1). There are several CD-ROM game formats. For example, the 320k CD-ROM disks contain a text file called a.toc. This file contains the title and date of the. (2) A generic tool called Darik's Boot and Nuke (DBAN) (3) can be used. (3) A tool called Darik's Boot and Nuke (DBAN) (4) to re-encode the game and the game's data so that it can be run on the new format. Availability PC PC CD-ROMs can be found in CD-ROM stores and music and game stores.
