

## [Download](#)

Fixed voice chat crash on non-recorded systems, by default the device with the most records is selected.

5.1.14. Fixed a bug when working with the session keyboard. 6.2.1 When selecting a password to enter the system, the login calculation now works, and if the log falls, then the password changes under the session. Also, new users can choose their own combination instead of the existing one. 7.2

Performance improvements Improved image display algorithm. Now with fast browsing, the page loading speed is significantly increased. 8.1 The algorithm for distributing the load on the processor has been optimized. The kernel now processes approximately 100% more pages in one working day, which in turn

---

has a positive effect on system performance. 9.1 The authorization and authentication module now supports a list of extensions. Fixed a bug when a user entered the server erroneously as a guest, but the login and password were changed to their own. 10.1 In this update, there was a small update of the SSL certificates server table. 11.1 Fixed application crash due to JSF update. 12.1 The mechanism for changing the encoding has been completely redesigned. Now after installing the JSR, the session keyboard is not displayed at all. Users cannot change the password during the current session (only when guests arrive) Users can set the username that will be displayed when entering the page (only for a user with a current session) It is required to additionally install JSRL on the ORIENT servers. The functionality of pinging servers has increased significantly, it has become faster Added the ability to change the IP address of the host if it is not defined in the interface Now in the proxy server you can specify values  $\hat{\epsilon}$  for channel marking of interrupts (interrupts do not turn on the backlight), as well as set the interval (step) to 100% for the full load of shaders

---

Developed parameters for caching using the parallel kernel model (1DB per session) In the server settings files, you can now set ticket servers Simplified package installation process Added "Change configuration settings via console" mode Accelerated check for the presence of external modules in the directory with installed software Added settings for logging to the database. Now they are automatically executed after connecting to the server. Sorted by date - they are now sorted by date
