WaterCut is a light-weight and fast segmentation application. Instead of complex filters like any image processing software, WaterCut provides a very intuitive interface for doing advanced image segmentation. Using the right mouse button, you can set the cutting edges for the watershed transformation, while viewing the segmentation result. The application can also process common graphic formats. WaterCut can automatically determine the optimal pen size for the image. Allows to apply a variety of segmentation filters to the selection in preview mode and the final output picture. The output result may be saved in several formats, including bitmap (BMP), GIF, JPEG, and PNG. The program is limited to the following file formats: PNG, GIF, JPG, and BMP. The program should work with any graphics software. Masks can be saved in some graphics formats. Installation instructions: Unpack the archive (tar.gz, tar.bz2) file and then run the executable. Do not forget to add the folder where you run the program to your system path or add the program to your Start Menu. The ship was the last of the revolutionary trio of ships that introduced the 'Atlantic passage', where passengers could travel without leaving land for a large part of their trip. In 1899 she began sailing around the world, using a route that took her through the Suez Canal. It was claimed that she covered more than 52,000 miles during this pioneering journey. She also became famous for the first ever transatlantic radio broadcast. She carried King Edward VII and Queen Alexandra on their 1862 world tour. On the voyage home from India in 1869, the ship was nearly lost when she was caught in a gale. The ship was the last of the four ships that comprised Cunard's famed White Star Line. After the opening of the Liverpool Titanic in 1912, she continued in service until her retirement in 1920. Today, the development of the local bicycle industry has slowed down.
